INTRODUCTION

“Welcome to NewLife Shelter Foundation, where hope takes root and transforms lives. Established with a vision to create a brighter future for vulnerable communities, our foundation is dedicated to the holistic development of children, empowering women, and fostering skill development.

At the heart of our mission is a commitment to providing quality education for children who face socio-economic challenges. We believe that education is the key to breaking the cycle of poverty, and through our programs, we strive to equip children with the knowledge and skills they need to build a better tomorrow.

In parallel, our initiatives focus on empowering women by offering them opportunities for personal and professional growth. Through vocational training, mentorship, and support networks, we aim to uplift and enable women to become agents of positive change in their communities.

Skill development is a cornerstone of our foundation, as we recognize the transformative power of honing talents and acquiring new skills. By providing training in various fields, we empower individuals to gain financial independence and contribute meaningfully to society.

Padhega India Tabhi To Chamak Uthega Hamara India”

Goal Of Newlife Shelter Foundation

At NewLife Shelter Foundation, we envision a future where every individual, regardless of their background, has the opportunity to unleash their full potential and lead a life of dignity and fulfillment. Our vision is rooted in three core pillars: Education, Skill Development, and Women Empowerment.

In Education, we aspire to create a world where every child has access to quality education, irrespective of socio-economic barriers. We envision schools that nurture creativity, critical thinking, and a love for learning, preparing students to face the challenges of the modern world. Our goal is to empower the next generation with the knowledge and skills they need to shape a brighter future for themselves and their communities.

In Skill Development, we aim to bridge the gap between education and employment by providing comprehensive training programs. Our vision is to equip individuals with practical skills that are relevant to the evolving job market. Through vocational training, apprenticeships, and mentorship programs, we strive to empower people to secure gainful employment, fostering economic independence and resilience.

In Women Empowerment, we envision a society where women are not only equal partners but also leaders in all aspects of life. Our commitment is to create a supportive environment that promotes gender equality, providing women with the tools and resources they need to break barriers. We seek to empower women through education, skill development, and entrepreneurship, enabling them to contribute actively to social and economic progress.

Our Projects

Akshar

In our project Akshar we have found a way to help children in attaining meaningful life skills, where a child is able to withstand the tests of practical life. At starting we enrolled 20+ children and within the span of 5 months with enrolled 150+ students.

So, you ask how it is possible. Mentors and teachers at Newlife Shelter Foundation studied the traditional way of schooling and coaching patterns and found the same flaws in both the systems. Thereafter, they developed a curriculum as the needs of today's student.

This curriculum includes extracurricular activities like Indoor and outdoor sports, dancing, singing, etc. which is allotted to students judging their interest. Along with these extracurricular activities Akshar programme also includes group activities and mental activities to improve day to day skills of students.

However, Newlife Shelter foundation has not forgotten that marks do matter for our education system to prove our knowledge. Hence, studies and regular CBSE curriculum is also a part of our academic syllabus Akshar Programme.

Samarthan

Women Empowerment often spoke of is very less seen in our society, especially in lower divisions of our society.

This lower division is where women empowerment is really needed as with a small household limited resources it is really difficult for the women of this division to manage. A secondary income is very well needed in these households. But, there are certain challenges to the solution of this problem one of them being these women cannot leave their houses and children alone to go and earn. Other challenge is not being well educated to get better opportunities.

Newlife Shelter foundation is up here to support these women to attain a better status in society. Hence, our project is named Samarthan as in support. Support to women education, Support to their households and support to them to stand out society.

Objectives

- Educating women so their knowledge is not limited and they can stand with the changing times.
- Helping them learn new skills like Stitching, Embroidery, Basic computer Skills, etc.
- Helping them to educate their children and family well to establish them well in the society.
- Make an understanding of teamwork discipline and resources in society.

Shiksha

Project Shiksha at its inception seeks to empower young minds to become self-reliant and skilled in this rapidly changing environment. The English language and basic computer skills are somethings that form the basic requirement of any entry-level job these days.

In order to converse, communicate and utilize effective communication and management, these skills are intrinsic and highly important to imbibe in the younger generation.

At the very least, this project will ensure that students above the age of 14 are empowered enough to get gainful employment, and even open avenues for higher and quality education if they so wish to pursue.

NewLife Shelter Foundation aims to provide basic teaching to these students and help

Awareness about Sanitary pads and Distribution

Our team conducted an educational session in Jagdamba camp, Malviya Nagar and in near by communities to raise awareness about the importance of menstrual hygiene.

We provided information on the benefits of using sanitary pads, proper disposal methods, and the impact of good menstrual hygiene on overall health

We have concerned with healthcare professionals to provide accurate information about menstrual health and address any medical concerns or misconceptions..

We have promised all the ladies that we will provide pads every month free of cost and they no need to worry about Sanitary pads, as we'll make it free for lifetime.

Ration Distribution

It's important to address the needs of those who are less fortunate and struggling with poverty. Rationing, or providing essential goods and resources to those in need, is one way to support them.

Our team is distributing ration and clothes to poor and needy people. We are working in Delhi and in all over India. We helped many families in Mumbai, Gujrat, Punjab, Andhra pradesh. We also distributed mask. Its our duty to help the needy people to make a difference in society .

Ration distribution ensures that individuals and families have access to basic nutritional requirements. This is particularly important for those who may not have the means to afford a balanced diet. Adequate nutrition is essential for overall health, growth, and development.

Women Empowerment

We recognize the transformative power of empowered women. Our women empowerment programs focus on providing education, skills training, and resources to women, enabling them to become self-reliant and influential members of their communities. We believe that when women thrive, families, communities, and entire societies thrive.

The primary objective is to uplift and empower women in underserved communities by providing them with the necessary skills, resources, and support to become economically self-reliant, socially confident, and active contributors to their families and communities. Through a holistic approach, this project aims to break the cycle of poverty and gender inequality.

It is a comprehensive initiative designed to address the multifaceted challenges faced by women in marginalized communities. It recognizes that women's empowerment is not limited to economic independence but also encompasses social, psychological, and emotional well-being. We seek to create an environment where women are equipped with the knowledge and tools to lead fulfilling lives and make positive changes within their households and communities.

We're dedicated to fostering a more inclusive and equitable society by empowering women with the skills, knowledge, and support they need to overcome challenges and lead fulfilling lives. Through women's empowerment, we believe in creating a brighter future for communities as a whole.

Drawing Competition

Our team organized a drawing competition in the slum area of Malviya nagar it was a fantastic way to engage the community, raise awareness about important issues, and showcase artistic talents. Drawing competitions encourage artistic expression and creativity. Children can use their artwork to express their thoughts and emotions about important social issues. It's not only a great way to encourage creativity but also a thoughtful initiative to support families in need.

5 children won the competition prizes, including Toys, Masks, Ration, Geometry Boxes, Biscuits, and Chocolates will surely bring joy and happiness to the winning children. Providing necessities like Masks and Ration to both the winning children and other participants' families demonstrates a commitment to supporting the community's well-being.
